INSTALLATION

STEP 1

Read and understand all of the enclosed instructions and verify that all parts are present and appear in good working order before you begin.

STEP 2

Attach the Wall Plate to the wall.

Wood Stud Mounting

The Wall Plate must be mounted, at the top and bottom, to at least 2 wooden studs, spaced a minimum of 16” apart. Locate two wooden studs and mark the center and edge locations. Position the Wall Plate over the marked wooden studs and mark for drilling. Using the correct size drill bit, pre-drill a 2.5” deep hole in each marked location. Attach the Wall Plate to the wall using the included square head screws and M8 washers (Figure 2).

NOTE: Do not use the concrete anchors illustrated in Figure 2 for wood stud mounting.

Concrete Wall Mounting

Choose a solid wall area (avoid securing the mount to mortar joints between concrete blocks or bricks). Using the correct size drill bit, pre-drill a 2.5” hole in each marked location. Insert the concrete anchor into the holes and then attach the Wall Plate to the wall using the included square head screws and M8 washers (Figure 2).

INSTALLATION

STEP 3

In the hardware bag provided, locate the 4 pan head bolts that fit the thread pattern for your television. With the two vertical brackets centered on the back of the TV, gently thread the screws into the holes by hand. DO NOT USE AN ELECTRIC OR BATTERY DRILL until you are certain you have the right size thread. DO NOT OVER TIGHTEN the screws (Figure 3).

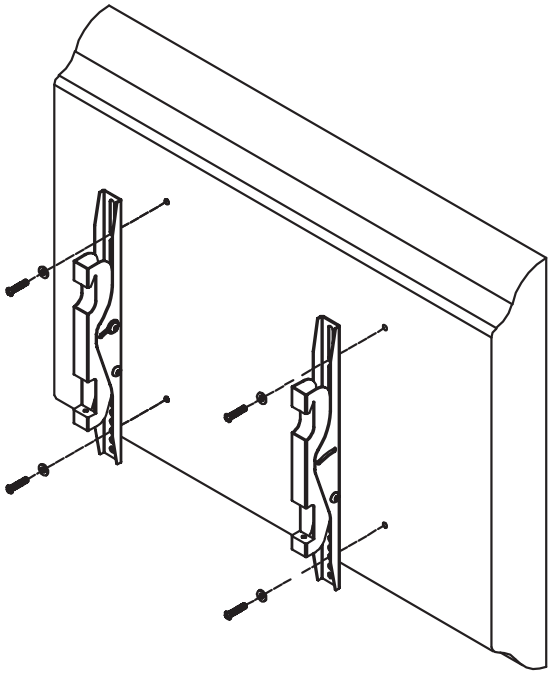

Figure 3 - Attach Brackets to TV

NOTE: Use the proper bolts and washers that correspond to the mounting holes on the back of the TV. Take care to tighten by hand first or damage to the mounting holes can occur. Some TVs without a flat back may require the use of a spacer when attaching the brackets. If applicable, make sure the two TV brackets are even and that they're using the same mounting holes on the bracket. Uneven assembly will cause the TV screen to slant.

INSTALLATION

NOTE: You will need at least 2 people to finish this mounting procedure. To avoid possible injury, do not attempt to mount the TV alone.

STEP 4

Screw the two handles (A) with washers (B) to the side of each bracket (Figure 5).

STEP 5

Hang the pre-assembled TV unit on the Wall Plate. Tighten the screws (A) at the bottom of each bracket to secure the brackets to the Wall Plate (Figure 6).

STEP 6

Adjust angle by loosening the side two handles to allow the TV to tilt forward up to 15 degrees or backward 5 degrees (Figure 7). Once the desired tilt angle is achieved, tighten the handle to secure the television in the new position. Take caution with wire clips to avoid damaging wires during angle adjustment.
